Cohen Children's Northwell Health

Behavioral Health Center at Rockville Centre

A School District Collaborative

We are here to help you!

Assessment: Our mental health clinician and child and adolescent psychiatrist will conduct a focused mental health evaluation, assessing immediate safety concerns and further mental health needs. If indicated and urgently needed, medication may be started in the urgent care setting.

Referral: The center will provide resources and support to connect you with community based mental health treatment in your area, when indicated, which includes psychotherapy, psychiatry and case management services (for those not already in treatment).

Coordination of care: Our team will reach out to your child's referring school, pediatrician, outpatient provider or case manager to collaborate and communicate findings and recommendations.

Transitional care: We offer in-person short term care and/or telephonic follow-up until a connection with outpatient treatment can be established.

Please note: The Behavioral Health Urgent Care Center does not provide ongoing mental health treatment and cannot perform medical assessments, physical exams, or diagnostic tests.
